Castello Signature Treatments

VinoAqua Therapy

Even in the ancient world people recognised the powerful effect of the grape, and wine was used for therapeutic purposes. Today's vinotherapy however has its roots in 17th century France. Grape skin baths were used to treat sciatica, arthritis and similar complaints. In 1991, Frenchman Serge Renaud managed to prove the effect of vinotherapy scientifically. The active ingredients and fatty acids of the grape seed oil have an extremely positive effect on health: cell regeneration, protection from free radicals, activating and stimulating to the skin. Grape seeds, grape skin and the leaves of the grape are sourced from the hotel's own vineyards, the Terreni alla Maggia.

Grape seed scrub for cell regeneration, followed by a purifying and draining wrap. Following that, enjoy a revitalizing Chardonnay bath or a relaxing Merlot bath. Finally, pamper your skin with a moisturizing body treatment.

To the Roots of Well-being

Oxy GeneO+ facial treatments

The new generation of wrinkle reduction, skin tightening and facial skin rejuvenation.

The therapeutic effect of hot springs on the skin has been known for hundreds of years. Oxygenation is stimulated by the high concentration of carbon dioxide in the water. Oxy GeneO+ technology allows us to imitate this effect. The body is stimulated to produce more oxygen.

GeneO+ oxygen activation

An oxygen peel with ultrasound. The top layer of the skin is gently exfoliated to remove dead cells, and the skin is smoothed and renewed. Thousands of small CO₂ molecules stimulate the skin to transport oxygen to the treated areas, allowing perfect nutrient absorption.

60 min | 220 CHF

GeneO+ Tripollar RF Energy

Intensive treatment with Geneo+ peeling and Tripollar RF as well as ultrasound. This allows the collagen fibres to contract, resulting in an immediate tightening of the skin. In addition, the production of collagen and elastin is built up and stimulated in the long term. The mask and a short massage complete the treatment. A comprehensive recontouring of the facial oval takes place.
